Education

University of Waterloo — Waterloo, ON
Bachelor of Computing and Financial Management — *Aug. 2025 – Expected May 2030*

Experience

Software Engineering Intern — May 2026 – Present
HyperOdd — *Toronto, ON*

- Built production Python/GCP data pipelines integrating Gemini models, real-time data sources, and AlloyDB/PostgreSQL persistence.
- Developed backend services that transform unstructured news and event data into typed, validated outputs with confidence scoring.
- Integrated WebSocket and REST API sources into event-driven workflows for low-latency processing and automated systems.
- Deployed services with Cloud Run, Docker, AlloyDB Proxy, systemd logging, and operational runbooks.

Artificial Intelligence Research Intern — Dec. 2025 – Feb. 2026
Vantxlab — *Toronto, ON*

- Developed AI-agent workflows for personalized recommendations, goal planning, and context-aware user experiences.
- Built full-stack product flows for onboarding, activity tracking, and user engagement while supporting reinforcement-learning experiments.

Projects

Finny | *TypeScript, Python, Bun, Solid.js, Convex* — Jan. 2026 – Present

- Developed an open-source developer platform for algorithmic-trading research, validation, backtesting, and deployment.
- Built cloud-backed persistence for workspaces, experiment artifacts, configuration state, and live-run telemetry.
- Implemented deterministic validation workflows that reconcile data coverage and produce inspectable research verdicts.

Claude Computer Use API | *Python, FastAPI, Claude API* — Jan. 2026

- Built a modular FastAPI backend for Claude-powered computer-use workflows with structured request/response handling.
- Designed API orchestration components for agentic applications and tool-driven automation.

MoodMate | *Python, Flask, JavaScript, GPT-4o* — Aug. 2025

- Built and deployed a full-stack application with authentication, persistent user history, and interactive data visualization.
- Integrated GPT-4o into a Flask backend and implemented browser-based voice interaction and camera-based emotion detection.

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, SQL, Java
Frameworks: FastAPI, Flask, Node.js, React, Solid.js
AI/ML: Generative AI, AI Agents, Reinforcement Learning, Gemini, GPT-4o
Cloud/Infrastructure: Google Cloud Platform, Cloud Run, Docker, GitHub Actions, systemd
Databases/Tools: PostgreSQL, AlloyDB, Convex, Git, REST APIs, WebSockets, pandas, NumPy
